ambitions
PROGRAMME

Description

This course is for 16-18 year olds who are passionate about a career in the retail motor industry. This qualification will provide you with the essential knowledge and skills to someday be a successful auto electrician within a motor vehicle garage or main dealership.

Your time will be split between our modern workshops and classroom study. You will work on a range of vehicles and work to industry standards within the college. This will include demonstrating professionalism at all times and working to high standards alongside our highly experienced staff.

Along with this qualification you will also gain a level one award in Electric vehicle awareness. This will add value to your CV when seeking your long term goal in the automotive industry.

What you learn:

Units include:

- Conducting pre and post work inspections
- Enhancing vehicle electrical system features
- Locating and correcting simple electrical faults
- Removing and fitting basic mechanical, electrical and trim components
- Repairing electrical units.

How you will be assessed:

You will be assessed by the IMI set practical assessments, online multiple-choice testing and assessments set by us.

What next:

Successful completion of all aspects of this course can lead to the employment in the auto-electrical retail motor industry, or ideally into an apprenticeship.

This qualification also provides a high level of underpinning knowledge and skills which allow progression onto some higher level qualifications in automotive related subjects, such as the IMIAL level 3 Diploma in auto electrical principles.
